

**ABID CASE #12**

1. What is the probable identity of this antibody(ies)?
2. Is any further workup needed to prove it? If additional cells need to be tested, what are their phenotypes?
3. What is the probable source of the immunizing stimulus in this case?
4. Is this patient at risk for hemolytic transfusion reactions?
5. How would we select compatible blood for this patient? What percentage of donors are expected to be compatible with this recipient?
